About Us

Established in 1999 by a team of semiconductor industry veterans, ePAK is a full-service designer, manufacturer and supplier of precision engineered products and solutions for the automated transport and handling of semiconductor and electronic devices. Our product areas include front-end wafer handling, back-end IC transport, and end-system sub-assembly handling. Our products are sold globally to top tier global customers including semiconductor companies, system OEMs, and IC assembly and test operations. Our large-scale manufacturing and design center in Shenzhen, China is centrally located to the semiconductor industry's back-end activities and supports a global network of JIT distribution centers. ePAK's corporate headquarters is located in Austin, Texas and we maintain nine sales and applications engineering offices worldwide.

Device protection and contamination control begins at the wafer fab and extends to the assembly site. ePAK never forgets that the most valuable product in the semiconductor and electronics industry is also the most fragile and susceptible to mishandling and contamination. Not all wafers are created equal...with back-grinding, unique material sets, and exotic semiconductor processes, one product does not fit all wafers.

From ePAK's most advanced eLX wafer canisters to cost efficient wafer jars, ePAK tailor fits their products to meet your requirements.

- Expanding constantly to meet increasing demand
- Semiconductor & electronics packaging market focused
- Customer driven product development
- Over 130 injection molding lines
- Full range of materials available
- 12 cleaning lines for wafer products
- 4 class 100 clean rooms (over 4500 sq. meters)

eLX™ WAFER CANISTERS*

- Enhanced protection of wafer surfaces
- Minimizes lateral movement without applying compression to delicate wafer edges
- Advanced design minimizes particle generation
- Secure 4 latch system (with 2 latch option)
- Impact resistant design
- Large label areas
- Interfaces with industry robotic handling equipment
- Drop-in replacement for old industry designs
- Protective shipping OverPAKs available...[see products](#)

RING SEPARATORS

- Ring Separators are used when a surface contact is not preferred. Outer raised edge of the ring contacts only the wafer outer circumference on its active surface.
- Ring separators are only for use in "eLX" style canisters as they require lateral movement to be minimized.
- The eLX canisters, eWB0383 & (200mm) and eWB0516mWB0371 (300mm) are designed for 25 wafers when using Ring Separators.
- "Fixed Height Ring Separators" (FHRS) are designed to self-stack. They always have same # of rings per canister & the stacking feature removes weight of wafer stack from individual wafers.

Wafer Size	ePAK Description	ePAK Order Code	Separator Diameter	Separator Thickness	Std Pack Quantity
STANDARD RING SEPARATORS (uses wafers thickness to establish separation)

*ePADTM * WAFER PROTECTION SYSTEM*

High performance alternative to foam-based solutions

- Made from proprietary, low-ionic, flexible, conductive polystyrene
- Ideal for both Cu and Al metallized wafers
- Best choice for both long and short term storage needs
- Available for 6", 8" and 12" wafer sizes

(PATENTS: US #7425362, Singapore #105587, Japan #4205540,
Taiwan #I297662, PRC#ZL 03 2 07819.6)

(Front Opening Shipping Box – 300mm wafers)

-
- A clear plastic enclosure housing a complex electronic circuit board. The board is populated with various components, including a large black integrated circuit (IC) at the top, several smaller ICs, and numerous surface-mount components. A large, white, rectangular component, possibly a heat sink or a specialized IC, is mounted on the left side. The enclosure has a hinged lid, and the internal components are visible through the transparent plastic.

WAFER STIFFENERS

Wafer Stiffener – Support system for ultra-thin, brittle wafers

- Proprietary, ultra-pure material
- Adds rigidity to sensitive ultra-thin wafers

Wafer Size	ePAK Description	ePAK Order Code	Stiffener Diameter	Stiffener Thickness	Std Pack Quantity

PLASTIC FLEX FRAMES

- Designed for 100, 125, 150, 200 and 300 mm wafers
- Low cost alternative to metal flex frames
- Designed to be used one time and then discarded
- Of special interest to those who ship wafers to customers on flex frames
 - No need to bear freight cost to return heavy metal frame
 - No need for cleaning metal frame before reuse
- Call for further details

Plastic Flex Frames – For shipping wafers mounted on tape

CHIP TRAY SYSTEM

2" Dice Tray Cover

2" Spring Box

2" Dice Tray

- Flexible packing system
- Fast tooling cycle time
- Standardized outline and full set of accessories including caps, clips and cover tray
- Convenient carrier for sample die, finished IC or other small components
- Contact ePAK today to discuss your custom chip tray solution
